

Dinh Huynh

problem solver/adventurer/amateur kombucha brewer

EMPLOYMENT

Software Engineer - **CACI** - July 2019 - Present

Instructor - **Austin Coding Academy** - March 2017 - Present

Software Engineer - **SCCI** - March 2017 - July 2019

Software Developer Intern - **Spredfast** - May 2015 - August 2016

Web Developer Intern - **Katy Prairie Conservancy** - May 2014 - August 2015

DEVELOPMENT

CACI - React/Java

SCCI - JS/C++/PHP

Austin Coding Academy - HTML/CSS/JS/React

alpha.austin.gov - React/JS

Spredfast - React/JS/Ruby on Rails

the little kitchen of mine - HTML/CSS/JS

HI, I'M Dinh

and I'm a software engineer based out of Austin, Texas. I develop robust software and web applications. An ideal position would be in an environment where I can use my creative engineering skills to solve complex problems, in a culture that values collaboration, diversity, and community-involvement

I love problem solving, which is exactly what I do when I

- Integrating data from third-party API's into complex JS applications
- Implement OAuth protocol for social media platforms in cross projects
- Designing software components and algorithms for the integration and creation of the required capabilities
- Integrate filepicket.io into the Intelligence platform at Spredfast. This allows users to export reports to multiple cloud services
- Troubleshooting cross-browser compatibility issues
- Build responsive design for cross browser and device accessibility
- Build lesson plans and teach web development at Austin Coding Academy

I also have a strong sense for being detail oriented and seeing "the big picture", which allowed me to

- Effectively communicate about day to day responsibility and constructive feedback on development issues
- Contribute to projects from conception to implementation; testing, monitoring, and revising as needed
- Take on challenging tasks and develop creative solutions through critical thinking

EDUCATION

The University of Texas at Austin - Dec 2016

Bachelor of Science in Computer Science

- With focus in Data Management and Information Security

Skill

- HTML5/CSS3
- JavaScript ES6
- React
- Java
- C++
- Node.js
- SQL
- Docker
- AWS
- Git / Github
- JIRA
- Confluence
